LED Strip Light
User Manual

IMPORTANT: PLEASE READ BEFORE USING THIS PRODUCT

LED GAMING KEYBOARD

PLUG + PLAY

- The keyboard is ready for use right out of the box. Just plug the USB-A connector into your computer's USB-A Port.
- Be sure to check your PC's settings if the keyboard is not detected.
- After connected successfully, the keyboard LED backlight is on. Press key "☼", to turn off the light; press it again, then turn on the light again(in this mode, the LED light effect is stationary).
- Press keys "FN"+ "☼" at the same time, the LED light then goes into breathing mode; if the keys are pressed again, then the LED Light reverts to fixed LED mode.

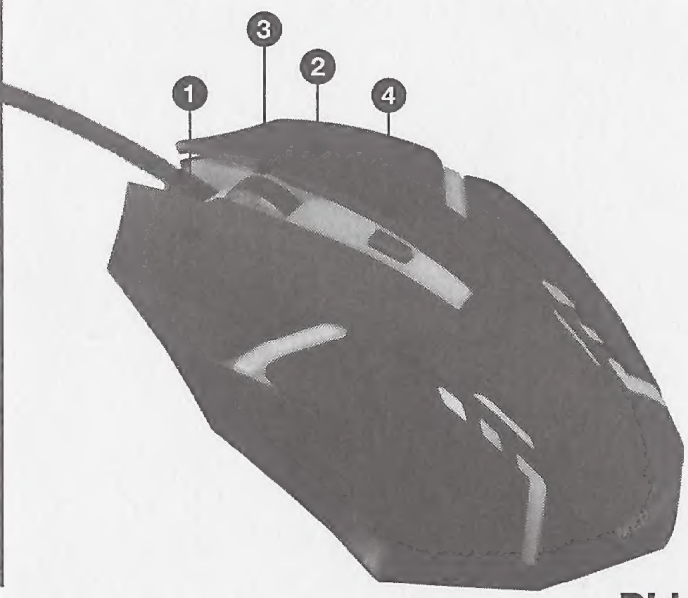
LED BACKLIGHT MODE CONTROL

☼ : backlight switch on/off
FN + " ☼ " : backlight goes into breathing mode
FN + " [+] " : increase backlight breathing speed
FN + " [−] " : decrease backlight breathing speed
FN + "PG UP" : increase backlight brightness (level 0-3)
FN + "PG DN" : decrease backlight brightness (level 0-3)

MULTIMEDIA KEYS:

FN + F1: Media
FN + F2: Volume-
FN + F3: Volume+
FN + F4: Mute
FN + F5: CD Stop
FN + F6: Previous Track
FN + F7: Play/Pause
FN + F8: Next Track
FN + F9: Mail
FN + F10: Web
FN + F11: Key Lock
FN + F12: Calculator

LED GAMING MOUSE



PRODUCT DIAGRAM

1. Left Button
2. Right Button
3. Scroll Wheel
4. DPI Button

PLUG + PLAY

- The mouse is ready for use right out of the box. Just plug the USB-A connector into your computer.
- Be sure to check your PC's settings if mouse is not detected.
- The DPI button is located in the center of the mouse. Clicking it alternates the mouse speed over 3 levels: 800, 1000, and 1200.

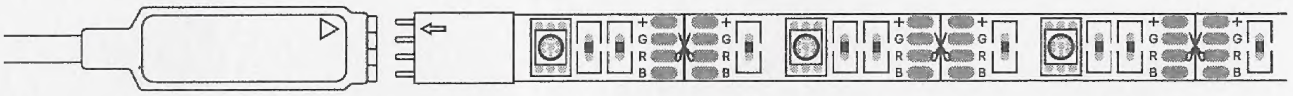
LED LIGHT STRIP

INSTALLATION

1. Clean the surface you intend to stick the light strip to.
2. Peel off the backing strip off the 3M adhesive tape.
   (be careful to peel off only the backing and not the adhesive)
3. Press and hold the light strip firmly against the surface.
4. Remove the tab from the battery compartment of the remote control.
5. Connect the USB cable to the USB port on a TV or a USB wall charger
   (1A charger required - not included).

JOIN LED STRIP TO IR CONTROLLER

Attach the IR Controller to the LED strip, making sure both ends are facing the correct way, as illustrated below:



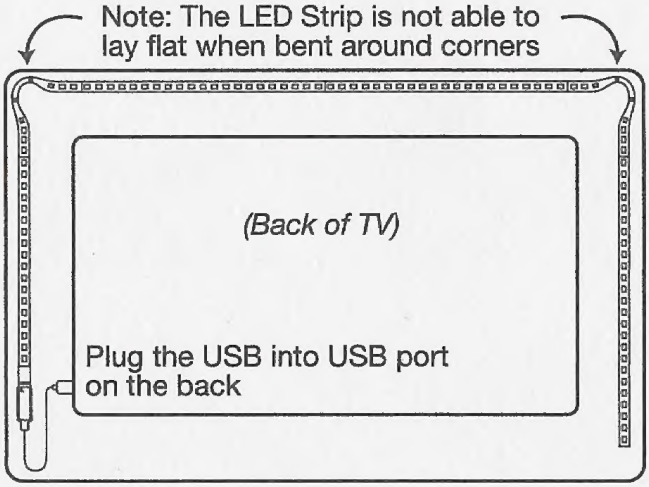
IR Controller,
with Arrow Side Facing Up

LED Strip,
with LED Lights Facing Up

The side of the IR Controller with the arrow, and the side of the LED strip with the LED lights, should both be facing up to properly connect. If they are not connected correctly, the LED strip will not power on.

To attach the LED Strip to the back of a TV or computer monitor, see diagram to the right.

For optimal performance:
Place the IR Controller in a location away from the IR receiver on the TV to avoid interference from the TV remote control.

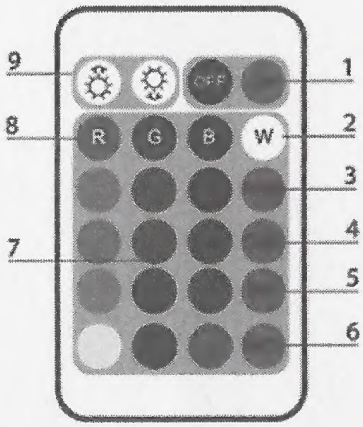


OPERATION

1. Turn on the LED strip by pushing the ON button on the remote control.
2. Select the desired color or the desired effect and push the corresponding button on the remote control.
3. Set the desired color brightness using the buttons to increase/decrease the intensity of color.
4. Push the OFF button to turn off the LED strip.

REMOTE CONTROL

1. On/Off
2. White light
3. Flash (flashing function)
4. Strobe (slow fading out of a color)
5. Fade (slow fading out with color change)
6. Smooth (smooth color change)
7. Control panel for color selection (15 mixed colors)
8. RGB setting (red, green, blue)
9. Increase/decrease the intensity of color



CHANGING THE REMOTE CONTROL BATTERY

The battery for the remote control has already been installed. Remove the battery pull tab to operate.

1. The battery compartment is located on the narrow side of the remote control.
2. Remove the empty battery and insert a 3V battery, type CR2025. The positive terminal must point upwards.
3. Place the battery compartment back in the remote control so it locks in place.

OS Compatibility:
Windows® XP/VISTA/7/8/10
Mac OS® X

Mouse Specifications:
Dimensions: 4.8 x 2.6 x 1.5 in
12.4 x 6.8 x 3.9 cm
